

AQUALUTION®

Aqualution's BS EN Certificates

BSENS have been undertaken or updated to conform to EU Biocide Product Dossiers – September 2023

Our products have been independently laboratory-tested and proven to be effective against a wide range of microorganisms and comply with:

13727 - Quantitative suspension test for the evaluation of bactericidal activity of chemical disinfectants for instruments used in the medical area.

13624 - test method to assess the fungicidal or yeasticidal efficacy of antiseptics and disinfectant products intended for use in medical area.

1500 - This European Standard specifies a test method simulating practical conditions for establishing whether a product for hygienic handrub reduces the release of transient microbial flora on hands when rubbed onto the artificially contaminated hands of volunteers.

14476 - Virucidal quantitative suspension test for chemical disinfectants and antiseptics used in human medicine.

16615 – chemical disinfectants and antiseptics quantitative test method for the evaluation of bactericidal and yeasticidal activity on non porous surfaces with mechanical action employing wipes in the medical area.

16777 - Quantitative Non-porous Surface test without Mechanical action for the Evaluation of Virucidal activity of Chemical Disinfectants used in Medical Area.

14348 - a phase 2 step 1 suspension test performed on disinfectants intended for use in the medical area to test the efficacy of the product against mycobacteria.

17387 - a phase 2 step quantitative carrier test for bactericidal, yeasticidal and fungicidal disinfectants.

17272 - Chemical disinfectants and antiseptics. Methods of airborne room disinfection by automated process.

17126 - a quantitative suspension test (phase 2, step 1) for disinfectants used in medical areas.

1650 - Quantitative suspension test for the evaluation of fungicidal or yeasticidal activity of chemical disinfectants and antiseptics used in food, industrial, domestic and institutional areas.

13697 - Quantitative non-porous surface test for the evaluation of bactericidal and/or fungicidal activity of chemical disinfectants used in food, industrial, domestic and institutional areas.

13704 - Quantitative suspension test for the evaluation of sporicidal activity of chemical disinfectants used in food, industrial, domestic and institutional areas.

AQUALUTION®

1656 - Quantitative suspension test for the evaluation of bactericidal activity of chemical disinfectants and antiseptics used in the veterinary area.

1657 - Chemical disinfectants and antiseptics. Quantitative suspension test for the evaluation of fungicidal or yeasticidal activity of chemical disinfectants and antiseptics used in the veterinary area.

17422 - Quantitative surface test for the evaluation of teat disinfectants used in the veterinary area.

14675 - Quantitative suspension test for the evaluation of virucidal activity of chemical disinfectants and antiseptics used in the veterinary area.

14204 - Quantitative suspension test for the evaluation of mycobactericidal activity of chemical disinfectants for instruments used in the veterinary area.

14349 - Quantitative Surface Test for the Evaluation of Bactericidal Activity of Chemical Disinfectants and Antiseptics used in the Veterinary area.

16437 - Quantitative surface test for the evaluation of bactericidal activity of chemical disinfectants and antiseptics used in veterinary area on porous surfaces without mechanical action.

16438 - carrier test to assess fungicidal or yeasticidal activity of chemical disinfectants and antiseptics for use on non-porous surfaces in veterinary areas.
