WHAT IS HYPOCHLOROUS ACID?

HOCl is one of nature's most effective antiviral substances found within our white blood cells as part of our immune system. We have created the world's purest and most stable version by the electrolysis of water and salt.

Already widely used within the NHS for faster, better and safer environmental disinfection, Salvesan Skin is now available as the most superior hand sanitiser.

Alcohol free liquid

Kills 99.9% of bacteria and 99.99% of enveloped viruses

Perfect for sensitive skin: non-irritating and non-sensitising

pH balanced and non-drying

Consultant dermatologically approved

Halal, vegan and cruelty free

Produced by the UK biocides dossier holder for hypochlorous
